

**Mandators from the public sector often need a technical, very specialized consulting service. This is enforced through the fact that the basic conditions of public authorities and administration in the field of agriculture and food are subject to a quick change. This is what the activities of AFC Public Services concentrate on.**

Having technical knowledge and experience from a number of consulting mandates for the public sector, we can help our partners even in case of complex problems. The big and growing number of long lasting customer relations underlines our success in doing so.
